Key Words: information technology infrastructure support

OEI's Office of Technology Operations and Planning provides EPA's information technology infrastructure and a range of supporting services to enable science-based information delivery. The poster highlights network, computing and system development resources used to provide scientists and decision makers with tools to perform their missions. Working in partnership with ORD organizations and stakeholders, OTOP provides infrastructure and services to support high-performance computing, scientific visualization, and other functions that enable scientific research and analysis. The content of this poster will complement the content of the other OTOP/NTSD posters and illustrate the supporting relationships.
